-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/16/06 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 15-19 and 28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 15-19 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,740,111 to Lauterjung.

Lauterjung discloses a closed loop (30) of flexible material in Figures 1 and 2. The loop (30) can be formed of nitinol (column 4, line 24). The loop is folded on itself for insertion through a catheter and automatically expanded in the body lumen to an

open configuration (Figure 3) (see column 2). As shown in Figures 2 and 24, the loop (30) can be curved as viewed perpendicularly from the feed direction.

The limitations *"configured to assume a first state in which said closed loop is folded on itself and substantially straightened so as to extend substantially parallel to said feed direction"* and *"results in deployment of said loop in a direction generally perpendicular to said feed direction"* are simply functional language. These limitations are statements of intended use of the components. The prior need only show the capability of functioning as set forth in the claims. The device of Lauterjung is capable of performing in a manner set forth in the claims. Lauterjung illustrates the loop being folded into a catheter (68) in Figures 13 and 14 and folded in a different manner in Figure 11. Although Lauterjung does not explicitly illustrate the loop folded so that it is parallel to the feed direction, the loop is capable of being folded and positioned in the catheter in this manner.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 6,428,572 to Nagai discloses a closed ring folded into a tubular insertion device in Figure 36.
